

SAFETY DATA SHEET

Pure Element Evaporation Materials

- According to:
 - OSHA Hazard Communication Standard (29 CFR 1910.1200)
 - Globally Harmonized System (GHS)
 - EU REACH Regulation

SECTION 1: Identification

Product Identifier

Pure Element Evaporation Materials

Synonyms

Elemental Evaporation Materials, Pure Metal Evaporation Materials, High Purity Evaporation Materials

Typical Products Include

Al, Ag, Au, Cr, Cu, Fe, Hf, In, Ir, Mg, Mo, Nb, Ni, Pd, Pt, Re, Si, Sn, Ta, Ti, W, Zn, Zr and related high-purity elemental evaporation materials.

Recommended Use

Thin film deposition, vacuum evaporation coating, semiconductor processing, optical coatings, scientific research, industrial use.

Supplier

Thin-Film Materials

Email: sales@thinfilmmaterials.com

SECTION 2: Hazard(s) Identification

GHS Classification

Solid elemental materials are generally not classified as hazardous under normal handling conditions.

Dust or particles generated during grinding, cutting, machining, crushing, or residue handling may cause eye irritation, skin irritation, and respiratory irritation.

Certain elemental materials may present additional hazards depending on composition and particle size.

Signal Word

Warning

Hazard Statements

Not applicable for solid articles under normal handling conditions.

Precautionary Statements

P261: Avoid breathing dust.

P271: Use only in well-ventilated areas.

P280: Wear protective gloves and eye protection.

P304+P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing.

P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.

Hazards Not Otherwise Classified

None known for intact solid materials.

SECTION 3: Composition / Information on Ingredients

Component

Pure Elemental Materials

CAS Number

Various

Content

99%

Component

Trace Impurities

CAS Number

Various

Content

<1%

Product composition varies depending on material type.

SECTION 4: First-Aid Measures

Eye Contact

Flush with water for at least 15 minutes.

Skin Contact

Wash thoroughly with soap and water.

Inhalation

Move affected person to fresh air.

Ingestion

Rinse mouth with water. Seek medical attention if symptoms persist.

SECTION 5: Fire-Fighting Measures

Suitable Extinguishing Media

- Water spray
- Foam
- Dry chemical
- Carbon dioxide

Specific Hazards

Bulk materials are generally stable and non-flammable under normal conditions.

Fine particles or dust generated during processing may present combustible dust hazards depending on material type.

Protective Equipment

Use standard firefighting protective equipment.

SECTION 6: Accidental Release Measures

Personal Precautions

Avoid generating airborne dust. Use appropriate personal protective equipment during cleanup.

Cleanup Methods

Collect material mechanically.

Environmental Precautions

Avoid environmental release of particulate matter.

SECTION 7: Handling and Storage

Handling

Avoid impact, dropping, and contamination during handling.

Use gloves when handling high-purity materials.

Storage

Store in a dry, clean environment away from moisture and corrosive atmosphere.

Certain reactive elemental materials may require inert atmosphere storage.

SECTION 8: Exposure Controls / Personal Protection

Engineering Controls

Use local exhaust ventilation during grinding, machining, or processing operations.

Eye Protection

Safety glasses or goggles.

Skin Protection

Protective gloves.

Respiratory Protection

Dust respirator if airborne particles are generated.

SECTION 9: Physical and Chemical Properties

Physical State

Solid

Appearance

Metal pieces, pellets, granules, wire, foil, slug, shot, or lump

Color

Characteristic metallic or elemental color

Odor

Odorless

Solubility

Generally insoluble in water

Density

Varies by composition

Melting Point

Varies by elemental material

SECTION 10: Stability and Reactivity

Chemical Stability

Stable under recommended storage conditions.

Conditions to Avoid

- Excessive mechanical stress
- Dust generation
- Contact with strong oxidizers
- Moisture exposure for reactive metals

Incompatible Materials

Strong oxidizing agents, strong acids.

Hazardous Decomposition Products

Metal oxides may form under extreme thermal conditions.

SECTION 11: Toxicological Information

Likely Routes of Exposure

- Inhalation of dust
- Eye contact
- Skin contact

Symptoms

- Respiratory irritation
- Eye irritation
- Skin irritation

Chronic Effects

Long-term inhalation of elemental dust should be avoided.

SECTION 12: Ecological Information

Ecotoxicity

No known significant environmental hazards in solid form.

Environmental Precautions

Avoid uncontrolled release of particulate matter into the environment.

SECTION 13: Disposal Considerations

Disposal Method

Dispose in accordance with local, regional, and national regulations.

Recycling

Metal recycling is recommended where applicable.

SECTION 14: Transport Information

UN Number

Not regulated

Proper Shipping Name

Not classified as dangerous goods

Hazard Class

None

Packing Group

None

SECTION 15: Regulatory Information

Regulatory Statement

This product is intended for industrial and research use only.

Compliance Reference

This SDS complies with:

- OSHA Hazard Communication Standard
- GHS Classification System
- EU REACH requirements (format reference)

SECTION 16: Other Information

Disclaimer

The information provided herein is believed to be accurate and reliable. However, no warranty is expressed or implied regarding its accuracy or

completeness. Users are responsible for determining the suitability of this material for their specific applications.
